

Establishment and Evaluation of Information System for Chemotherapy Care

Authors : Yi-Ting Liu, Pei-Ying Wen

Abstract : In order to improve the overall safety of chemotherapy, safety-protecting net was established for the whole process from prescribing by physicians, transcribing by nurses, dispensing by pharmacists to administering by nurses. The information system was used to check and monitor whole process of administration and related sheets were computerized to simplify the paper work.

Keywords : chemotherapy, bar code medication administration, medication safety
