Lexical Bundles in the Alexiad of Anna Comnena: Computational and Discourse Analysis Approach

Authors : Georgios Alexandropoulos

Abstract : The purpose of this study is to examine the historical text of Alexiad by Anna Comnena using computational tools for the extraction of lexical bundles containing the name of her father, Alexius Comnenus. For this reason, in this research we apply corpus linguistics techniques for the automatic extraction of lexical bundles and through them we will draw conclusions about how these lexical bundles serve her support provided to her father.
