Abstract : Since a very long time ago, Indonesia are well known for their hospitality. Hospitality has been one of the civility concepts that represented Indonesia's culture. However, as an Indonesian, we found that nowadays we are starting to lose this particular culture. The influence of modern culture is undeniably strong. As a capital city, Jakarta is one of the most modern cities in Indonesia. We conduct this experimental study to find out whether the people in Jakarta are still willing to maintain their identity as a friendly Indonesian or not by testing their willingness to reply greetings from strangers.
