

A Research on Determining the Viability of a Job Board Website for Refugees in Kenya

Authors : Prince Mugoya, Collins Oduor Ondiek, Patrick Kanyi Wamuyu

Abstract : Refugee Job Board Website is a web-based application that provides a platform for organizations to post jobs specifically for refugees. Organizations upload job opportunities and refugees can view them on the website. The website also allows refugees to input their skills and qualifications. The methodology used to develop this system is a waterfall (traditional) methodology. Software development tools include Brackets which will be used to code the website and PhpMyAdmin to store all the data in a database.

Keywords : information technology, refugee, skills, utilization, economy, jobs
