

An Engineering Review of Grouting in Soil Improvement Applications

Authors : Mohamad Kazem Zamani, Meldi Suhatri

Abstract : Soil improvement is one of the main concerns of each civil engineer who is working at soil mechanics and geotechnics. Grouting has been used as a powerful treatment for soil improving. In this paper, we have tried to review the grouting application base on grouts which is used and also we have tried to give a general view of grout applications and where and when can be used.

Keywords : cementious grouting, chemical grouting, soil improvement, civil engineering

Conference Title : ICSMGE 2014 : International Conference on Soil Mechanics and Geotechnical Engineering

Conference Location : Penang, Malaysia

Conference Dates : December 04-05, 2014
