

Assessment of Master's Program in Technology

Authors : Niaz Latif, Joy L. Colwell

Abstract : Following implementation of a master's level graduate degree program in technology, a research-based assessment of the program was undertaken to determine how well the program met its goals and objectives, and the impact of the degree program on the objectives and the needs of its graduates. Upon review of the survey data, it was concluded that the program was meeting its goals and objectives and that the directed project option should be encouraged.

Keywords : master's degree, graduate program, assessment, master's program in technology
