

Pipeline Construction in Oil and Gas Fields as per Kuwait Oil Company Procedures

Authors : Jasem Al-Safran

Abstract : Nowadays Oil and Gas industry considered as one of the biggest industries around the world although it caused a lot of pollution to the world and it caused many damages to the mankind and the other creatures around the globe it still one of the biggest industries, it create millions of careers around the globe which reduced the poorness level and make the mankind life's much more comfortable you may compare the humans life before the exploration of the oil and after the oil industries development. Construction project's consist of 3 major sections also we call them EPC projects the first section is the detailed engineering, the second section is the procurements section and finally is the Construction section, each section required a specialized work force with a different skills in order to handle the work load for example in the oil sector and depending on the nature of the project and the project size the Construction team required mechanical engineer, civil engineer, electrical engineer and instrumentation engineer, also a work site supervisor for each disciplines also a huge number of labors, technicians and many equipment's.

Keywords : Construction, EPC, Project, Work force

Conference Title : ICCACSE 2020 : International Conference on Computer-Aided Civil and Structural Engineering

Conference Location : Rome, Italy

Conference Dates : March 05-06, 2020
