

Knowledge, Attitude and Practice of the Congolese Population from Basic Territorial Entities on Family Planning:a Forgotten issue. Case of Murara Sector(City of Goma, Democratic Republic of Congo)

Authors : Mwamba Mwamini Ruth

Abstract : For many authors,the percentage of married or in union persons using family planning methods has increased significantly since the 1960s, despite this progress, important differences across régions are observer.These différences become even greater,to present a paradox,when studying the issue in smallest territorial entities in developing countries.In line with the above,the general objective of this research is to investigate into "knowledge , attitude and practice"of households from a basic territorial entity,here in"Murara Sector"(in the city of Goma, province of North Kivu,Democratic Republic of Congo,Africa)on family planning (as defined and provisioned by the four World Health Organization-WHO key texts on the matter)

Keywords : DRC, family planning methods, information technology, Murara
