

Arts and Cultural Heritage Digitalization in Nigeria: Problems and Prospects

Authors : Okechukwu Uzoma Nkwocha, Edward Uche Omeire

Abstract : Information and communication technologies (ICT) undeniably, have expanded the sphere of arts and creativity. It proves to be an important tool for production, preservation, sharing and utilization of arts and cultural heritage. While art and heritage institutions around the globe are increasingly utilizing ICT for the promotion and sharing of their collections, the story seems different in most part of Africa. In this paper, we will examine the prospects and problems of utilizing ICT in promotion, preservation and sharing of arts and cultural heritage.

Keywords : arts, cultural heritage, digitalization, ICT
