

## Awareness of Students and Teachers towards AIDS and AIDS Education

**Authors :** Anjan Saikia

**Abstract :** 1000 school going adolescents and 200 teachers from 16 schools of Dibrugarh and Tinsukia districts of Assam were surveyed to assess and compare their awareness regarding HIV/AIDS and AIDS Education. An awareness test was administered containing 38 items for adolescents and 40 items for teachers in the test. Observations revealed that the majority of school-going adolescents are poor in their HIV/AIDS and AIDS education awareness. It shows that the school going adolescents of Tinsukia district are better in HIV/AIDS and AIDS education awareness than the school going adolescents of Dibrugarh district while comparing the sex and district wise variables.
