

A Methodology for Sustainable Interoperability within Collaborative Networks

Authors : Aicha Koulou, Norelislam El Hami, Nabil Hmina

Abstract : This paper aims at presenting basic concepts and principles in order to develop a methodology to set up sustainable interoperability within collaborative networks. Definitions and clarifications related to the concept of interoperability and sustainability are given. Interoperability levels and cycle that are components supporting the methodology are presented; a structured approach and related phases are proposed.

Keywords : Interoperability, sustainability, collaborative networks, sustainable Interoperability

Conference Title : ICSII 2020 : International Conference on Semantic Interoperability and Integration

Conference Location : Kuala Lumpur, Malaysia

Conference Dates : December 17-18, 2020
