

## Antibacterial Activity of Northern Algerian Honey

**Authors :** Messaouda Belaid, Salima Kebbouche-Gana, Djamila Benaziza

**Abstract :** Our study focuses on determining the antibacterial activity of some honeys from northern Algeria. To test this activity, the agar well diffusion methods was employed. The bacterial strains tested were Staphylococcus aureus, Bacillus subtilis, Streptococcus faecalis, Klebsiella pneumoniae, Escherichia coli, and Pseudomonas aeruginosae. The results showed that all the microbes tested were inhibited by all honey used in this study but Those bacteria that appear to be more sensitive to all honey tested are Staphylococcus aureus and Pseudomonas aeruginosae.

**Keywords :** honey, antibacterial activity, Northern Algeria, Staphylococcus aureus
