Cloud Computing in Jordanian Libraries: An Overview

Authors : Mohammad A. Al-Madi, Nagham A. Al-Madi, Fanan A. Al-Madi

Abstract : The current concept of the technology of cloud computing libraries has been increasing where users can store their data in a virtual space and can be retrieved from anywhere whilst using the network. By using cloud computing technology, industries and individuals save money, time, and space. Moreover, data and information about libraries can be placed in the cloud. This paper discusses the meaning of cloud computing along with its types. Further, the focus has been given to the application of cloud computing in modern libraries. Additionally, the advantages of cloud computing and the areas in which cloud computing be applied with current usage are discussed. Finally, the present situation of the Jordanian libraries is considered and discussed in further detail.
Keywords : cloud computing, community cloud, hybrid cloud, private cloud, public cloud
