

Artificial Intelligence: Mathway and Its Features

Authors : Aroob Binhimd, Lyan Sayoti, Rana Almansour

Abstract : In recent years, artificial intelligence has grown drastically. This has led to the growth of educational programs to help students in solving educational problems and assist them in understanding certain topics. The purpose of this report is to investigate the Mathway application. Mathway is a mathematics software that teaches students how to solve and handle mathematical issues. The app allows students to insert questions manually on the platform or take a picture of the question, and then they get an answer to this mathematical question. It helps students enhance their performance in mathematics. This app can also be used to verify or check if their answers are correct. The report will include a questionnaire to collect data and analyze the users of this application.

Keywords : artificial intelligence, Mathway, mathematics, mathematical problems

Conference Title : ICMA 2021 : International Conference on Multimedia and Applications

Conference Location : Toronto, Canada

Conference Dates : September 20-21, 2021
