

Collation between the Architecture of the Churches and Housing from Antiquity to the Present Day

Authors : Shaloom Mbambu Kabeya, Léonard Kabeya Mukeba

Abstract : Churches, cathedrals and castles beaten from antiquity to modern times were relevant from that time to the present day, and preserved as cultural heritage. Our predecessors as François 1er¹, Michelangelo², and Giotto³ left us traces. Gustave Eiffel⁴, Hector Guimard⁵ did not decrease their time to show modernization (evolution) in architecture. Plagiarism is a brake on architectural development, construction works of spirits is necessary architecture. This work explains the relationship between ancient and modern architecture. It also shows the power of mathematics in modern architecture.

Keywords : architectural modernization, heritage, mathematical architecture, materials
