

A Comprehensive Approach to Create 'Livable Streets' in the Mixed Land Use of Urban Neighborhoods Applying Urban Design Principles Which Will Achieve Quality of Life for Pedestrians

Authors : K. C. Tanuja, Mamatha P. Raj

Abstract : Urbanisation is happening rapidly all over the world. As population increasing in the urban settlements, its required to provide quality of life to all the inhabitants who live in. Urban design is a place making strategic planning. Urban design principles promote visualising any place environmentally, socially and economically viable. Urban design strategies include building mass, transit development, economic viability and sustenance and social aspects.

Keywords : livable streets, social interaction, pedestrian use, urban design
