

InfoMiracles in the Qur'an and a Mathematical Proof to the Existence of God

Authors : Mohammad Mahmoud Mandurah

Abstract : The existence of InfoMiracles in scripture is evidence that the scripture has a divine origin. It is also evidence to the existence of God. An InfoMiracle is an information-based miracle. The basic component of an InfoMiracle is a piece of information that could not be obtained by a human except through a divine channel. The existence of a sufficient number of convincing InfoMiracles in a scripture necessitates the existence of the divine source to these InfoMiracles. A mathematical equation is developed to prove that the Qur'an has a divine origin, and hence, prove the existence of God. The equation depends on a single variable only, which is the number of InfoMiracles in the Qur'an. The Qur'an is rich with InfoMiracles. It is shown that the existence of less than 30 InfoMiracles in the Qur'an is sufficient proof to the existence of God and that the Qur'an is a revelation from God.

Keywords : InfoMiracle, God, mathematical proof, miracle, probability

Conference Title : ICQ 2022 : International Conference on Quran

Conference Location : Dubai, United Arab Emirates

Conference Dates : April 07-08, 2022
