

Using Equipment Telemetry Data for Condition-Based maintenance decisions

Authors : John Q. Todd

Abstract : Given that modern equipment can provide comprehensive health, status, and error condition data via built-in sensors, maintenance organizations have a new and valuable source of insight to take advantage of. This presentation will expose what these data payloads might look like and how they can be filtered, visualized, calculated into metrics, used for machine learning, and generate alerts for further action.

Keywords : condition based maintenance, equipment data, metrics, alerts

Conference Title : ICMM 2022 : International Conference on Maintenance Management

Conference Location : New York, United States

Conference Dates : June 02-03, 2022
