

Analyzing the Oil and Gas Exploration Opportunities in Poland: Five Prospective Areas Selected and Dedicated to the Tender

Authors : Krystian Wójcik, Sara Wróblewska, Marcin Łojek, Katarzyna Sobień

Abstract : Polish Geological Survey selected five of the most prospective areas for oil and gas exploration in Poland. They are dedicated to the 6th international tender round for hydrocarbon concessions, planned in 2022. The main exploration target of these areas is related to conventional and unconventional accumulations of gas and oil in the Carpathian basement, Carpathian Foredeep and Outer Carpathians (Block 413 - 414), as well as in the Carboniferous, Rotliegend, Main Dolomite (Block 208, Cybinka - Torzym, Zielona Góra West), and in the Mesozoic of the Polish Lowlands (Koło).

Keywords : concession policy, international tender, oil and gas exploration horizons, prospective areas

Conference Title : ICOGPG 2022 : International Conference on Oil, Gas and Petroleum Geology

Conference Location : Vienna, Austria

Conference Dates : June 23-24, 2022
