

The Impact of the Inclusive Center on Social and Psychological State of Beneficiaries

Authors : Parvina Ismayilova

Abstract : Inclusion is like cultural diversity because, in the modern world, it is understood as everything that allows you to immerse yourself in the environment with the opportunity to expand your experience. In a narrow sense, inclusion is more associated with "inclusive education" and "inclusive technologies" - that is, it is a principle that allows people with disabilities to interact with the outside world. Technological progress allows people to unite, ensuring that they are seen and heard.

Keywords : diversity, disability, inclusivity, equality
