

## Urgent Need for E -Waste Management in Mongolia

**Authors :** Enkhjargal Bat-Ochir

**Abstract :** The global market of electrical and electronic equipment (EEE) has increasing rapidly while the lifespan of these products has become increasingly shorter. So, e-waste is becoming the world's fastest growing waste stream. E-waste is a huge problem when it's not properly disposed of, as these devices contain substances that are harmful to the environment and to human health as they contaminate the land, water, and air. This paper tends to highlight e-waste problem and harmful effects and can grasp the extent of the problem and take the necessary measures to solve it in Mongolia and to improve standards and human health.
