

Job Crafting Mediating Effect Between Positive Psychological Capital and Creativity in Working Life

Authors : Nuray Turan, Maria Karanika-Murray

Abstract : In working life, positive behavior and positive mood researches has given importance more and more. Increasing research on the subject reveals this importance. In this context, positive psychological capital (PsyCap), job crafting (JC), and creativity are among the prominent issues in working life. However, it is noteworthy that there is not enough research on the interaction between these three concepts. Therefore, this research has been designed. The question "Does the interaction between JC and PsyCap improve creativity in working life?" has been raised, and "Job Crafting Mediating Effect Between Positive Psychological Capital and Creativity" has been questioned. A questionnaire will be applied using PsyCap, JC and Creativity scales to find answers to the aforementioned questions. Who will be the survey participants is in the process of being determined.

Keywords : positive psychological capital, job crafting, creativity, working life
