

The Analysis of the Challenge China's Energy Transition Faces and Proposed Solutions

Authors : Yuhang Wang

Abstract : As energy is vital to industrial productivity and human existence, ensuring energy security becomes a critical government responsibility. The Chinese government has implemented the energy transition to safeguard China's energy security. Throughout this progression, the Chinese government has faced numerous obstacles. This article seeks to describe the causes of China's energy transition barriers and the steps taken by the Chinese government to overcome them.

Keywords : energy transition, energy market, fragmentation, path dependency
