

## Execution of Joinery in Large Scale Projects: Middle East Region as a Case Study

**Authors :** Arsany Philip Fawzy

**Abstract :** This study is going to address the hurdles of project management in the joinery field. It is widely divided into two sections; the first one will shed light on how to execute large-scale projects with a specific focus on the middle east region. It will also raise major obstacles that may face the joinery team from the site clearance and the coordination between the joinery team and the construction team. The second section is going to technically analyze the commercial side of the joinery and how to control the main cost of the project to avoid financial problems. It will also suggest empirical solutions to monitor the cost impact (e.g., Variation of contract quantity and claims).

**Keywords :** clearance, quality, cost, variation, claim
