

Motion Capture Based Wizard of Oz Technique for Humanoid Robot

Authors : Rafal Stegierski, Krzysztof Dmitruk

Abstract : The paper focuses on robotic tele-presence system build around humanoid robot operated with controller-less Wizard of Oz technique. Proposed solution gives possibility to quick start acting as a operator with short, if any, initial training.

Keywords : robotics, motion capture, Wizard of Oz, humanoid robots, human robot interaction

Conference Title : ICRIS 2014 : International Conference on Robotics and Intelligent Sensors

Conference Location : Kyoto, Japan

Conference Dates : November 13-14, 2014
