

Innovation of e-Learning for Architectural Design Courses at the University of Jordan

Authors : Samer Abu Ghazaleh, Jawdat Gousous

Abstract : E-learning in general started in Jordan around ten years ago in universities and at different departments and colleges. This paper will investigate the possibility to apply e-learning in architecture department at University of Jordan. As known architecture departments in general depend greatly in its syllabus upon design courses and studios, which consists nearly one third of its total credit hours. A survey has been conducted for architectural students at the University of Jordan and several conclusions have been reached irrespective of age, gender and nationality of the students, where the main problem was the way of the communication between the tutor and the student.

Keywords : cellular telephone, design courses, e-learning, internet
