

## Eccentric Connectivity Index, First and Second Zagreb Indices of Corona Graph

**Authors :** A. Kulandai Therese

**Abstract :** The eccentric connectivity index based on degree and eccentricity of the vertices of a graph is a widely used graph invariant in mathematics. In this paper, we present the explicit eccentric connectivity index, first and second Zagreb indices for a Corona graph and sub division-related corona graphs.

**Keywords :** corona graph, degree, eccentricity, eccentric connectivity index, first zagreb index, second zagreb index, subdivision graphs
