

Knowledge and Information Sharing in the Opinion of the Polish Academic Community

Authors : Marzena Świgoń

Abstract : The purpose of this paper is to describe the perceptions of knowledge and information sharing by the Polish academic community. An electronic questionnaire was used to gather opinions of respondents. The presented results are a part of the findings of empirical studies carried out amongst academics from various types of universities and academia located throughout Poland.

Keywords : academics, information sharing, knowledge sharing, scholarly communication
