

Evidence of Scientific-Ness of Scriptures

Authors : Shyam Sunder Gupta

Abstract : GOD is the infinite source of knowledge and from time to time, as per the need of mankind, keeps revealing a portion of HIS knowledge as " Words" through chosen messengers. In the course of time, " Words" get converted into scripture. This process of conversion happens after a long gap of time and with the involvement of a large number of persons; and unintentionally scientific and other types of errors get into scriptures; otherwise scriptures are in reality, truly scientific. Description of Chronology of life in the womb (Fetal Development), Five types of rotations of celestial bodies, Speed of the Sun, Rotation of Universe, Multiple verses, Spherical shape of the earth, Measurement of time, Classification of species by nature of birth, Evolution process of non-living matter and living species, etc., most convincing prove that scriptures are truly scientific. In fact, there are many facts for which, till date, science has not found answers, but are available in scriptures; like source of Singularity from which the Big Bang took place and the Universe was created, the Infinite number of Universes, the most fundamental particle, Param-anu(God particle), fundamental of measurement of time and many more.

Keywords : Big Bang, God Particle, Scientific, Scriptures, Singularity, Universe

Conference Title : ICCRT 2024 : International Conference on Comparative Religion and Theology

Conference Location : Toronto, Canada

Conference Dates : June 13-14, 2024
