

## Studying the Impact of Agricultural Producers Support Policy in Export Market

**Authors :** Yazdani Saeed, Rafiei Hamed, Nekoofar Farahnaz

**Abstract :** Governments Policies play a major role in national and international Markets. Pistachio is one of the most important non-oil export commodity of Iran. Therefore, in this study the relation between the producer support policies and the export of Pistachio was examined. An econometric model (VAR) was applied to test the study hypothesis. According to the estimated coefficient in VAR model, lag of producer support index has a significant and negative effect on variation of Pistachio's export in short term. In other word, in short term, export advantage index is dependent on the amount of producers support in previous period.
