

## Lightweight Materials for Building Finishing

**Authors :** Sarka Keprdova, Nikol Zizkova

**Abstract :** This paper focuses on the presentation of results which were obtained as a part of the project FR-TI 3/742: "System of Lightweight Materials for Finishing of Buildings with Waste Raw Materials". Attention was paid to the lightweighting of polymer-modified mortars applicable as adhesives, screeds and repair mortars. In terms of repair mortars, they were ones intended for the sanitation of aerated concrete.

**Keywords :** additives, light aggregates, lightweight materials, lightweight mortars, polymer-modified mortars
