

Ways of Innovative Sustainable Agriculture in India

Authors : Shailja Thakur

Abstract : In this paper it is shown that how farmers are suffering from all sides including vagaries of weather then price fluctuations, demand supply constraints, poor soil health etc. Also the ICT can prove to be of great help if incorporated rightly into Indian agriculture. Some innovative ways to reward farmers and distribution of subsidies to them can improve the current scenario.

Keywords : cost of farming, information and communication technology, innovative steps, roof gardening, vermicomposting
