

Grammarly's Use and Application in Today's Society and Its Constant Effort to Increase Efficiency

Authors : Lamar Rajab, Zain Aljiffri, Lana Al Saibi, Alaa Sabahi

Abstract : This report delves into the application Grammarly, a tool that employs artificial intelligence to identify and correct grammatical errors in written content. The report talks about Grammarly and its significance in the realm of writing assistance. It then presents the findings of a survey conducted to gauge public opinions on the app, shedding light on user satisfaction levels and areas for improvement. It further provides an overview of the features and functionalities of Grammarly, showcasing how it enhances writing accuracy and quality. By synthesizing user feedback and app details, this report offers valuable insights into the effectiveness and reception of Grammarly in the context of grammar correction through artificial intelligence.

Keywords : artificial intelligence, grammar correction, natural language processing, text classification

Conference Title : ICMLDLA 2024 : International Conference on Machine Learning, Deep Learning and Applications

Conference Location : Montreal, Canada

Conference Dates : June 13-14, 2024
