

## Your Third Step to Understanding Research Ethics: Survey-Based Perspective

**Authors :** Sadeq Al Yaari, Ayman Al Yaari, Adham Al Yaari, Montaha Al Yaari, Aayah Al Yaari, Sajedah Al Yaari

**Abstract :** Objective: This research summarizes the third volume of the book entitled: "Research Ethics". It aims at surveying KSU as a typical and practical example for scientific resources and references along with some couriers that can be used for transferring these resources from one place to another. Method: It is a survey and analytic research design wherein the researchers attempted to list, describe and analyze the resources and references, notably those relating to linguistics. The researchers have also analyzed the role of some famous couriers in sending and receiving scientific resources. Results KSU has one of the most organized systems in the field of scientific research and is a reliable provider of information references and resources. Couriers are effective means through which the researcher can get the resource s/he needs to complete his scientific project.
