

## Teaching and Education Science as a Way of Enhancing Student's Skills and Employability

**Authors :** Nabbengo Minovia

**Abstract :** Teaching and education science encompasses a broad spectrum of research and practices aimed at understanding and improving the processes of teaching and learning. This abstract explores key themes within this field, including pedagogical methodologies, educational psychology, curriculum development, and the integration of technology in education. It highlights the importance of evidence-based practices in enhancing student outcomes and fostering lifelong learning. The abstract also discusses current trends such as personalized learning, inclusive education, and the role of educators as facilitators of knowledge and critical thinking. By examining these aspects, this abstract aims to contribute to the ongoing dialogue on effective educational strategies and their impact on shaping future generations.

**Keywords :** employability through skilling, excellence as a way to self-esteem, science as an art, skills gained through learning

**Conference Title :** ICTES 2024 : International Conference on Teaching and Education Sciences

**Conference Location :** Zurich, Switzerland

**Conference Dates :** September 16-17, 2024
