

The Problem of Relation between Concepts Empathy and Decentration in Psychology

Authors : Elina Asriyan, Lusine Stepanyan

Abstract : This article is devoted to the study of connection between empathy and decentration. We have discovered a positive connection between these two indicators. Empathy is a variety of emotional decentration, and due to the decentration development process. To understand the investigated phenomenon it was applied a complex approach. The recorded results state that empathy and decentralization are interconnected with each other; empathy being a type of emotional decentralization is conditioned by the formation process of decentration.

Keywords : empathy, decentration, emotional decentration, egocentricity
