Modeling of International Financial Integration: A Multicriteria Decision

Authors : Zouari Ezzeddine, Tarchoun Monaem

Abstract : Despite the multiplicity of advanced approaches, the concept of financial integration couldn't be an explicit analysis. Indeed, empirical studies appear that the measures of international financial integration are one-dimensional analyses. For the ambivalence of the concept and its multiple determinants, it must be analyzed in multidimensional level. The interest of this research is a proposal of a decision support by multicriteria approach for determining the positions of countries according to their international and financial dependencies links with the behavior of financial actors (trying to make governance decisions or diversification strategies of international portfolio ...

Keywords : financial integration, decision support, behavior, multicriteria approach, governance and diversification
