

The Effect of Artificial Intelligence on Digital Factory

Authors : Keroles Benyamen Shafik Benyamen

Abstract : up to date making plans has the undertaking of designing products, flora, strategies, organization, areas, and the development of a up-to-date. The requirements for manufacturing facility updated making plans and the constructing of a up to date have modified in latest years. normal restructuring is turning in updated extra crucial up to date be able updated keep the competitiveness of a up to date updated. restrictions in new regions, shorter lifestyles cycles of product and manufacturing technology up-to-date a VUCA world (Volatility, Uncertainty, Complexity & Ambiguity) cause extra common restructuring measures inside a up to date updated. A virtual up-to-date model is the making plans foundation for rebuilding measures and up-to-date an integral up-to-date. quick-time period rescheduling can now not be treated by means of on-web site inspections and guide measurements. The tight time schedules require 3177227fc5dac36e3e5ae6cd5820dcaa making plans models. up to date because of the high edition rate of updated dries defined above, a method for rescheduling updated dries on the idea of a current virtual up to date dual is conceived and designed for practical software in up-to-date restructuring projects. the point of interest is on rebuild processes. The goal is up-to-date keep the planning basis (digital up-to-date version) for conversions within a up to date up-to-date. This calls for the software of a method that reduces the deficits of current approaches. The aim is up-to-date how a virtual up to date version can be up-to-date up-to-date at some point of ongoing up to date operation. a way based on photogrammetry era is offered. the focus is on growing a easy and value-powerful approach updated music the many adjustments that occur in a manufacturing unit building at some point of operation. The technique is preceded by a hardware and software program contrast up to date pick out the most reasonably priced and quickest variation.

Keywords : augmented reality, digital factory model, factory planning, restructuring digital factory model, photogrammetry, restructuring

Conference Title : ICDF 2025 : International Conference on Digital Factory

Conference Location : New York, United States

Conference Dates : January 30-31, 2025
