

## On Adaptive and Auto-Configurable Apps

**Authors :** Prisa Damrongsiri, Kittinan Pongpianskul, Mario Kubek, Herwig Unger

**Abstract :** Apps are today the most important possibility to adapt mobile phones and computers to fulfill the special needs of their users. Location- and context-sensitive programs are hereby the key to support the interaction of the user with his/her environment and also to avoid an overload with a plenty of dispensable information. The contribution shows, how a trusted, secure and really bi-directional communication and interaction among users and their environment can be established and used, e.g. in the field of home automation.
