

Developing a Test Specifications for an Internationalization Course: Environment for Health in Thai Context

Authors : Rungrawee Samawathdana, Aim-Utcha Wattanaburanon

Abstract : Test specifications for open book or notes exams provide the essential information to identify the types of the test items with validity of the evaluations process. This article explains the purpose of test specifications and illustrates how to use it to help construct the approach of open book or notes exams. The complication of the course objectives is challenging for the test designing.

Keywords : course curriculum, environment for health, internationalization, test specifications
