

The Regulation on Human Exposure to Electromagnetic Fields for Brazilian Power System

Authors : Hugo Manoel Olivera Da Silva, Ricardo Silva Thé Pontes

Abstract : In this work, is presented an analysis of the Brazilian regulation on human exposure to electromagnetic fields, which provides limits to electric fields, magnetic and electromagnetic fields. The regulations for the electricity sector was in charge of the Agência Nacional de Energia Elétrica-ANEEL, the Brazilian Electricity Regulatory Agency, that made it through the Normative Resolution Nº 398/2010, resulting in a series of obligations for the agents of the electricity sector, especially in the areas of generation, transmission, and distribution.

Keywords : adverse effects, electric energy, electric and magnetic fields, human health, regulation

Conference Title : ICEET 2015 : International Conference on Electrical Engineering and Technology

Conference Location : Paris, France

Conference Dates : February 23-24, 2015
