

Degree of Approximation by the $(T.E^1)$ Means of Conjugate Fourier Series in the Hölder Metric

Authors : Kejal Khatri, Vishnu Narayan Mishra

Abstract : We compute the degree of approximation of functions $\tilde{f} \in H_w$, a new Banach space using $(T.E^1)$ summability means of conjugate Fourier series. In this paper, we extend the results of Singh and Mahajan which in turn generalizes the result of Lal and Yadav. Some corollaries have also been deduced from our main theorem and particular cases.

Keywords : conjugate Fourier series, degree of approximation, Hölder metric, matrix summability, product summability

Conference Title : ICMMS 2014 : International Conference on Mathematics and Mathematical Sciences

Conference Location : Zurich, Switzerland

Conference Dates : January 14-15, 2014
