

Oct to Study Efficacy of Avastin in Recurrent Wet Age Related Macular Degeneration and Persistent Diffuse DME

Authors : Srinivasarao Akuthota, Rajasekhar Pabolu, Bharathi Hepattam

Abstract : Purpose: To assess the efficacy of intravitreal Avastin in subjects with recurrent wet AMD and persistent diffuse DME on the basis of OCT. Design: Retrospective, non-comparative, observational study, single center study. Conclusion: The study showed that intravitreal Avastin has an equivalent effect on recurrent AMD and in persistent diffuse DME.

Keywords : age-related macular degeneration (AMD), diffuse diabetic retinopathy (DME), intravitreal Avastin (IVA), optical coherence tomography (OCT)

Conference Title : ICOO 2015 : International Conference on Ophthalmology and Optometry

Conference Location : London, United Kingdom

Conference Dates : February 16-17, 2015
