

Technoscience in the Information Society

Authors : A. P. Moiseeva, Z. S. Zavyalova

Abstract : This paper focuses on the Technoscience phenomenon and its role in modern society. It gives a review of the latest research on Technoscience. Based on the works of Paul Forman, Bernadette Bensaude-Vincent, Bruno Latour, Maria Caramenz Carlotto and others, the authors consider the concept of Technoscience, its specific character and prospects of its development.

Keywords : technoscience, information society, transdisciplinarity, European Technology Platforms
