

## A New IFO Estimation Scheme for Orthogonal Frequency Division Multiplexing Systems

**Authors :** Keunhong Chae, Seokho Yoon

**Abstract :** We address a new integer frequency offset (IFO) estimation scheme with an aid of a pilot for orthogonal frequency division multiplexing systems. After correlating each continual pilot with a predetermined scattered pilot, the correlation value is again correlated to alleviate the influence of the timing offset. From numerical results, it is demonstrated that the influence of the timing offset on the IFO estimation is significantly decreased.
