

## Control of Sensors in Metering System of Fluid

**Authors :** A. Harrouz, O. Harrouz, A. Benatallah

**Abstract :** This paper is to review the essential definitions, roles, and characteristics of communication of metering system. We discuss measurement, data acquisition, and metrological control of a signal sensor from dynamic metering system. After that, we present control of instruments of metering system of fluid with more detailed discussions to the reference standards.

**Keywords :** data acquisition, dynamic metering system, reference standards, metrological control
