

Control of Sensors in Metering System of Fluid

Authors : A. Harrouz, O. Harrouz, A. Benatiallah

Abstract : This paper is to review the essential definitions, roles, and characteristics of communication of metering system. We discuss measurement, data acquisition, and metrological control of a signal sensor from dynamic metering system. After that, we present control of instruments of metering system of fluid with more detailed discussions to the reference standards.

Keywords : data acquisition, dynamic metering system, reference standards, metrological control
