

A Comparative Study of Language Learning Strategy Use of Iranian Kurdish Bilingual and Persian Monolingual in EFL Context

Authors : Reza Khani, Ziba Hosseini

Abstract : This study was an attempt to investigate the difference between learners of Iranian Kurdish-Persian bilingual language and Persian monolinguals, regarding language strategy use (LLS). The participants of the study were 120 monolingual Persian and 120 bilingual Kurdish studying English as a foreign language (EFL). Data were collected using strategy inventory for language learning SILL. The results show bilingual reported higher use of language learning strategies in all categories of SILL except memory strategies.

Keywords : language learning, memory, monolingual, comparative study
