

Effectiveness of Language Learning Strategy Instruction Based on CALLA on Iranian EFL Language Strategy Use

Authors : Reza Khani, Ziba Hosseini

Abstract : Ever since the importance of language learning strategy instruction (LLS) has been distinguished, there has been growing interest on how to teach LLS in language learning classrooms. So thus this study attempted to implement language strategy instruction based on CALLA approach for Iranian EFL learners in a real classroom setting. The study was testing the hypothesis that strategy instruction result in improved linguistic strategy of students. The participant of the study were 240 EFL learners who received language learning instruction for four months. The data collected using Oxford strategy inventory for language learning. The results indicated the instruction had statistically significant effect on language strategy use of intervention group who received instruction.

Keywords : CALLA, language learning strategy, language learning strategy instruction, Iranian EFL language strategy
