

Control and Automation of Sensors in Metering System of Fluid

Authors : Abdelkader Harrouz, Omar Harrouz, Ali Benatallah

Abstract : This paper is to present the essential definitions, roles and characteristics of automation of metering system. We discuss measurement, data acquisition and metrological control of a signal sensor from dynamic metering system. After that, we present control of instruments of metering system of fluid with more detailed discussions to the reference standards.

Keywords : communication, metering, computer, sensor

Conference Title : ICECSE 2015 : International Conference on Electrical and Computer Systems Engineering

Conference Location : London, United Kingdom

Conference Dates : June 28-29, 2015
